

North-East District- Council Nomination 2025

Elden Menezes, P.Eng.

Statement of intent: I intend to run as a candidate as provincial councillor for the APEGNB NE region. In my professional career, I provide guidance and direction to various colleagues and coworkers that work in different professions in my industry (Electricians, junior engineers). Through a combination of interpersonal skills and personality, I relate well to others, helping to bridge gaps and facilitate communication resulting in positive working relationships with electricians, operators, vendors, contractors, and engineering team members.

Member outreach and engagement is important. Helping to facilitate activities that pique member interest, such as industry tours draws member interest, and enhances the overall experience. I feel that my role as NE branch executive council member would further enhance my role as a Provincial Councillor and would be a means for me to give back to the association.

Biography: *Elden has a BSc in Electrical Engineering from the University of Calgary, specializing in Power Systems.*

Since graduation in 2011, he's been working in the Power Generation industry starting in Coal/Thermal Power plants and shifting to Renewable Energy. Since 2017, he's been based in Bathurst, NB working for ENGIE North America, supporting a growing renewable fleet of Wind, Solar, and Battery Storage, as a Renewable Operations Senior Engineer. Elden is registered with APEGA and APEGNB as a professional engineer.
