

Saint John District Council Nomination 2025

Scott Saunders, P.Eng.

Statement of intent: I believe engineers have the power to be enablers and implementers of positive change in our province and municipalities. I seek to increase opportunities for APEGNB members, especially newer professionals, to serve on boards or volunteer with organizations that can provide them a voice in their community and an opportunity to build technical and social experience and confidence while community organizations benefit from having engineers or EITs guiding decision making. Maintaining the principles on which our organization and profession are built is paramount to maintaining public trust, and should continue to be central to our mission. As well the world is a better place with more engineers, eng techs and trades people, any work we can do to promote these disciplines and work with other organizations that do is better for society and our profession as a whole. Continuing to increase the volume and variety of member meet ups should also be a priority to increase collaboration and community in our field.

Biography: Scott Saunders is an Electrical Engineer living in Saint John, NB and originally from Florenceville, NB. Scott currently works as the operations Manager for The Smart Energy Company in Quispamsis where he manages an engineering team as well as construction and warehouse crews for renewable energy projects, mostly solar and battery systems for agricultural customers. Scott as well has previous experience consulting across Canada with Transit agencies looking to understand their infrastructure needs to operate fully electrified fleets and has worked on major capital projects in the pulp and paper industry. Scott has plenty experience managing budgets both for projects and operations and has experience collaborating on strategic direction setting and financial planning with his current employer as well as in the past on major projects. In his spare time Scott likes to run, spend time with family and friends, and scuba dive.
